

Because the FCC was created to serve the public interest and safeguard the airwaves from commercial purposes alone, I sincerely believe that by allowing huge corporations to own more and more broadcasting vehicles as citizens in a democracy we will be severely crippled. The airwaves must in every way serve the local interest that supports them and not the conglomerates that own them. I find it quite frightening that the FCC would even consider such a move and wonder what is in it for those who prescribe to the belief that fewer opinions allowed coverage to our great nation is a positive move forward for our country.
